

INVITATION

gtz German Technical Cooperation

You are cordially invited to attend the final event of the cooperation project, hosted by the Western Cape Department of Environmental Affairs and Development Planning together with GTZ's TERNA Wind Energy Programme. This event will take place on the 24th of November 2009 at the River Club, Observatory, Cape Town.

The Department together with GTZ and Eskom signed a co-operation agreement with the objective to support development of the wind industry in the Western Cape as well as the achievement of the regional targets of **15 % renewable energies by the year 2014 and 15 % reduction of CO₂ emissions by the year 2020.**

The programme includes the presentation and hand over of the comprehensive **Regional Regulatory Action Plan Report as well as the Grid Study Report.** We have also invited wind farm developers, local wind turbine manufactures and international players to share their experiences in growing the industry.

The breakaway sessions will give you, the participant and key stakeholder, an opportunity to comment on the official reports presented and discuss the appropriate actions to be taken next. From the discussions that follow, Province aims to commit to concrete steps that can be taken which will ensure the growth of the renewable energy industry, and in particular the wind energy industry.

Please register by **18 November 2009** by email to alnoble@pgwc.gov.za or fax 021 483 3093. Please note that seats are limited and we kindly request companies to not send more than 3 representatives.
